

Chrome In-line Filter

The T-safe Chrome In-Line Filter is designed for commercial settings, offering a high-capacity, long life cycle filtration solution in applications where a tap- or shower filter cannot be installed. It serves as a versatile retrofit option for a wide range of water system installations, such as drinking water dispensers and supply pipework, to ligature-resistant tap and shower outlets.

Ideal for

- Drinking water dispensers and vending machines
- Ice machines
- Supply pipework to ligature-resistant tap and shower outlets

Features

- 0.2 µm rated sterilizing grade membrane filter
- High-capacity filter with up to 92-day life cycle
- Compact design enables installation in areas with restricted space
- Constant flow technology ensures optimal flow performance over life cycle
- Replacement filter cartridge system extends use and reduces overall cost
- Integral check valve prevents backflow contamination upstream
